ABOUT ME

I am a fullstack developer with a passion for creating and developing web applications. I have experience with technologies like React, Django and SQL.

EDUCATION

Politechnika Śląska/ Silesian University of Technology

Specialization: Computer Science and medical equipment, Field of study: Biomedical Engineering

Completed with engineer degree.

2020 – January 2024

EXPERIENCE

VisualNet

Junior Front-end developer:

The work involved web development using React and pure CSS and JavaScript. This experience, allowed me to develop skills in the front-end area, learn about Docker and develop git version control skills, through conflict resolution, among other things. Additionally, I have experience with Figma.

June 2023– December 2023

PROJECTS

Transplant app

This project, developed for engineering thesis, is designed to streamline the organ transplantation process. It allows donors to easily manage their donation profiles (CRUD operations), and enables hospitals to review profiles and reach out to suitable donors.

Tech stack: React, MUI, Django, SQL.

Social media app

This is a social media app that allows users to create groups and posts. It also has a user authentication system and a profile page.

Tech stack: Django, Bootstrap.

Frontend skills:

- JavaScript
- React
- Redux
- Tailwind
- Material-UI
- HTML, CSS

Backend skills:

- Python
- Django
- REST API
- SQL

Other skills:

- Docker
- Git/ Github
- Figma
- Postman

Language skills:

- English: C1
- Spanish: A2
- Polish: native

Interests:

- Cooking
- Windsurfing
- Squash
